Professional Summary

Full Stack Developer with **2+ years** of experience building scalable web applications using **Next.js, React, TypeScript, Node.js, NestJS, Prisma, PostgreSQL, and MongoDB**. Experienced in developing REST APIs, integrating **Microsoft Graph API**, implementing secure authentication systems, optimizing SEO, and deploying scalable cloud-native applications using **AWS** and **Azure** with CI/CD pipelines. Passionate about building performant, secure, and user-centric applications.

Technical Skills

- **Languages:** JavaScript | TypeScript | Java | SQL | HTML5 | CSS3
- **Frontend:** React.js | Next.js | Tailwind CSS | Responsive Design | SSR | SSG
- **Backend:** Node.js | NestJS | Express.js | REST APIs | JWT | RBAC | Microservices
- **Developer Tools:** Git | GitHub | VS Code | Postman | Figma | Google Analytics | Lighthouse
- **Database & ORM:** MongoDB | PostgreSQL | Prisma ORM | MySQL | Redis
- **Cloud & DevOps:** AWS EC2 | GitHub Actions | CI/CD Pipelines | Nginx | PM2 | SSH | Docker | Environment Configuration
- **Platform & Integrations:** SEO Optimization | Microsoft Graph API | Azure Communication Services | Firebase | Technical SEO

Professional Experience

Full Stack Developer

Tedekstra Limited

Remote , UK 11/2025 – Present

- Designed **OAuth mailbox** integration using **Microsoft Graph API and Azure**, automating calendar processing while ensuring **GDPR-compliant** workflows.
- Designed and ran production **Node-Cron job systems** for quote reminders, installation reviews, product expiry alerts, lead reactivation, lead contact reminders, contract expiration checks, and referrer reconciliation—**automating over 80%** of recurring tasks.
- Implemented secure **JWT authentication** and granular **RBAC** (superadmin, admin and staff data scoping) across leads, customers, quotes, contracts, residuals, and support tickets, reducing unauthorized access risk and speeding role-based workflows by **~30%**.
- Developed multi-provider **payment residual processing (Trust Payments, Clover, Modern World)** with Excel parsing, batch deduplication, commission aggregation, and PDF reports, processing **1,000+ rows** per upload and improving report turnaround by 3x.
- Built a scalable **CDR/SDR usage-to-invoice ETL pipeline** with **charge-matrix rating**, VAT/margin logic, unmatched-usage reconciliation, and PDF invoicing, improving billing throughput by **~50%** and cutting manual finance work by **~40%**.
- Engineered category-based quote/contract PDF generation and **e-signature** workflows (mobile, broadband, payments, insurance), including payment-mandate capture, reducing contract cycle time by **~35%**.
- Built outbound email workflows with **Microsoft 365 / Microsoft Graph API** (with **Azure Communication Services** fallback) for quotes, lead alerts, renewals, and operational notifications, improving delivery reliability by **~25%**.
- Delivered end-to-end **CRM modules** for lead pipeline, product catalog, multi-site customers, referrer commissions, profit tracking, and CI/CD deployments, sustaining 3x traffic spikes while keeping API response **times improved by ~50%** on critical endpoints.
- Integrated Next.js frontend with **NestJS microservices** using **Prisma ORM**, enabling scalable and type-safe API communication.

Software Developer (SDE-1)

Genius Labs

Noida , India 07/2024 - 06/2025

- Built and maintained web applications using **Next.js** and **MongoDB**, improving page load times by **30%**.
- Automated **CI/CD deployments** on **AWS EC2** using **GitHub Actions**, reducing deployment time by **70%** and enabling faster production releases.
- Integrated **Firebase JWT authentication** into Next.js, reducing unauthorized login attempts and enabling secure, seamless login experiences akin to streaming services.
- Integrated **Easebuzz payment gateway** and **TrustSignal SMS OTP** verification, improving transaction success rate by 25%.
- Integrated **Google Analytics**, **JSON-LD** structured data and Next.js App Router, achieving a **98/100 Lighthouse SEO score**.

Web Developer

Freelance

Noida, India 03/2023 - 05/2023

- Developed and maintained responsive **Next.js applications**, improving page performance by **30%** through **SSR, SSG** and code optimization.
- Implemented **API integration** enabling secure, type-safe and efficient **frontend-backend communication** in a full-stack application.
- Integrated third-party **RESTful APIs** to manage customer data, inventory, and workflows, reducing API response time by **20%**.
- Converted **UI/UX designs** into pixel-perfect, mobile-first interfaces while improving performance and accessibility.
- Delivered responsive and SEO-friendly web solutions by collaborating directly with clients and meeting project deadlines.

Projects

Global News Live - Real-Time News Aggregation Platform (globalnews.live):

- Built a production-ready news aggregation platform using Next.js, TypeScript, and Tailwind CSS, integrating NewsAPI, deployed on **AWS EC2 with GitHub Actions CI/CD** pipeline achieving **99.9% uptime**, enabling zero-downtime deployments on every push or merge to the main branch.
- Configured **Nginx reverse proxy** for routing traffic and **PM2** for process management, ensuring automatic app recovery after crashes or reboots. Managed environment variables securely using `.env.local` and **GitHub Secrets** for deployment.
- Implemented **server-side API routes** with secure server-side rendering to fetch and aggregate news data, **reducing API response time by 35%** and improving security by eliminating client-side API key exposure; integrated advanced search functionality with pagination and category-based filtering enabling users to discover news efficiently across 7+ major categories.

SEO-Optimized Educational Blog Platform:

- Developed an **SEO-optimized** educational blog platform using Next.js, React, TypeScript, and Tailwind CSS, significantly boosting online presence and organic traffic.
- **Optimized** performance and accessibility by utilizing **Server Components, Static Site Generation (SSG)**, and **Integrated** comprehensive SEO strategies with structured data (**JSON-LD schemas**), dynamic metadata generation, automated sitemap, and robots.txt creation, semantic HTML, and accessibility features ensuring **WCAG compliance**, leading to improved **Core Web Vitals** and user experience.

Adaptive Learning Platform for Exam Preparation:

- Developed a secure, personalized exam preparation framework for grades 9–12, achieving a 92% user satisfaction rate and a 35% improvement in test readiness among students.
- Implemented an adaptive learning platform that monitored student progress with 97% accuracy, dynamically adjusting content complexity to boost engagement by 50% and reduce cognitive overload by 30%.

Education

Bachelor of Technology	<u>Delhi Technical Campus</u>	<i>Noida, India</i>	2020 – 2024
• Computer Science Engineering – 8.99 CGPA			
Senior Secondary Education	<u>St Mary's School(ICSE)</u>	<i>Bijnor, India</i>	2018 – 2019
• Mathematics and Computer Science – 8.02 CGPA			

Certification

- **Certification of Training:** Web Development -Internshala 2022
- **Certificate of Internship:** Python(Core and Advanced) –Edufabrica Pvt Ltd 2022
- **NPTEL Certification:** Data Structure and Algorithms Using Java – NPTEL 2023
- **Certificate of Internship:** Software Developer Intern -STEM Quest Education Pvt Ltd 2024
